- If currency of a country depreciates, import becomes costlier against USD.
- If currency of country appreciates, import becomes cheaper against USD.
- If Indian currency is depreciating, gains of currency depreciation can be passed on to the buyer (importer). But if the importing country’s currency depreciates more than Indian currency (in case of export from India) then even after passing gains due to depreciation by Indian exporter to the importer, landed cost of import still remain higher. Here, FTA helps. FTAs/PTAs/CECAs/CEPAs provide preferential treatment to Indian Origin Goods in Export market, which makes landed cost of import cheaper.

- Exporters of the SHEFEXIL's products therefore have to study their export markets in terms of currency appreciation and depreciation along with tariff preferences available under FTAs/PTAs/CECAs/CEPAs.
- If we compare Exchange Rates of selective currencies against US Dollar as on 01.04.2018 and 31.05.2018, it is found that currencies of most of the important trade partners have appreciated. In other words, imports become cheaper in these markets and hence more opportunity to increase export. List of currencies appreciated is as under:
